

Parts of a Tortoise

Match the names of the parts of the tortoise with their descriptions. Then, cut and stick them in the correct place to label the tortoise.

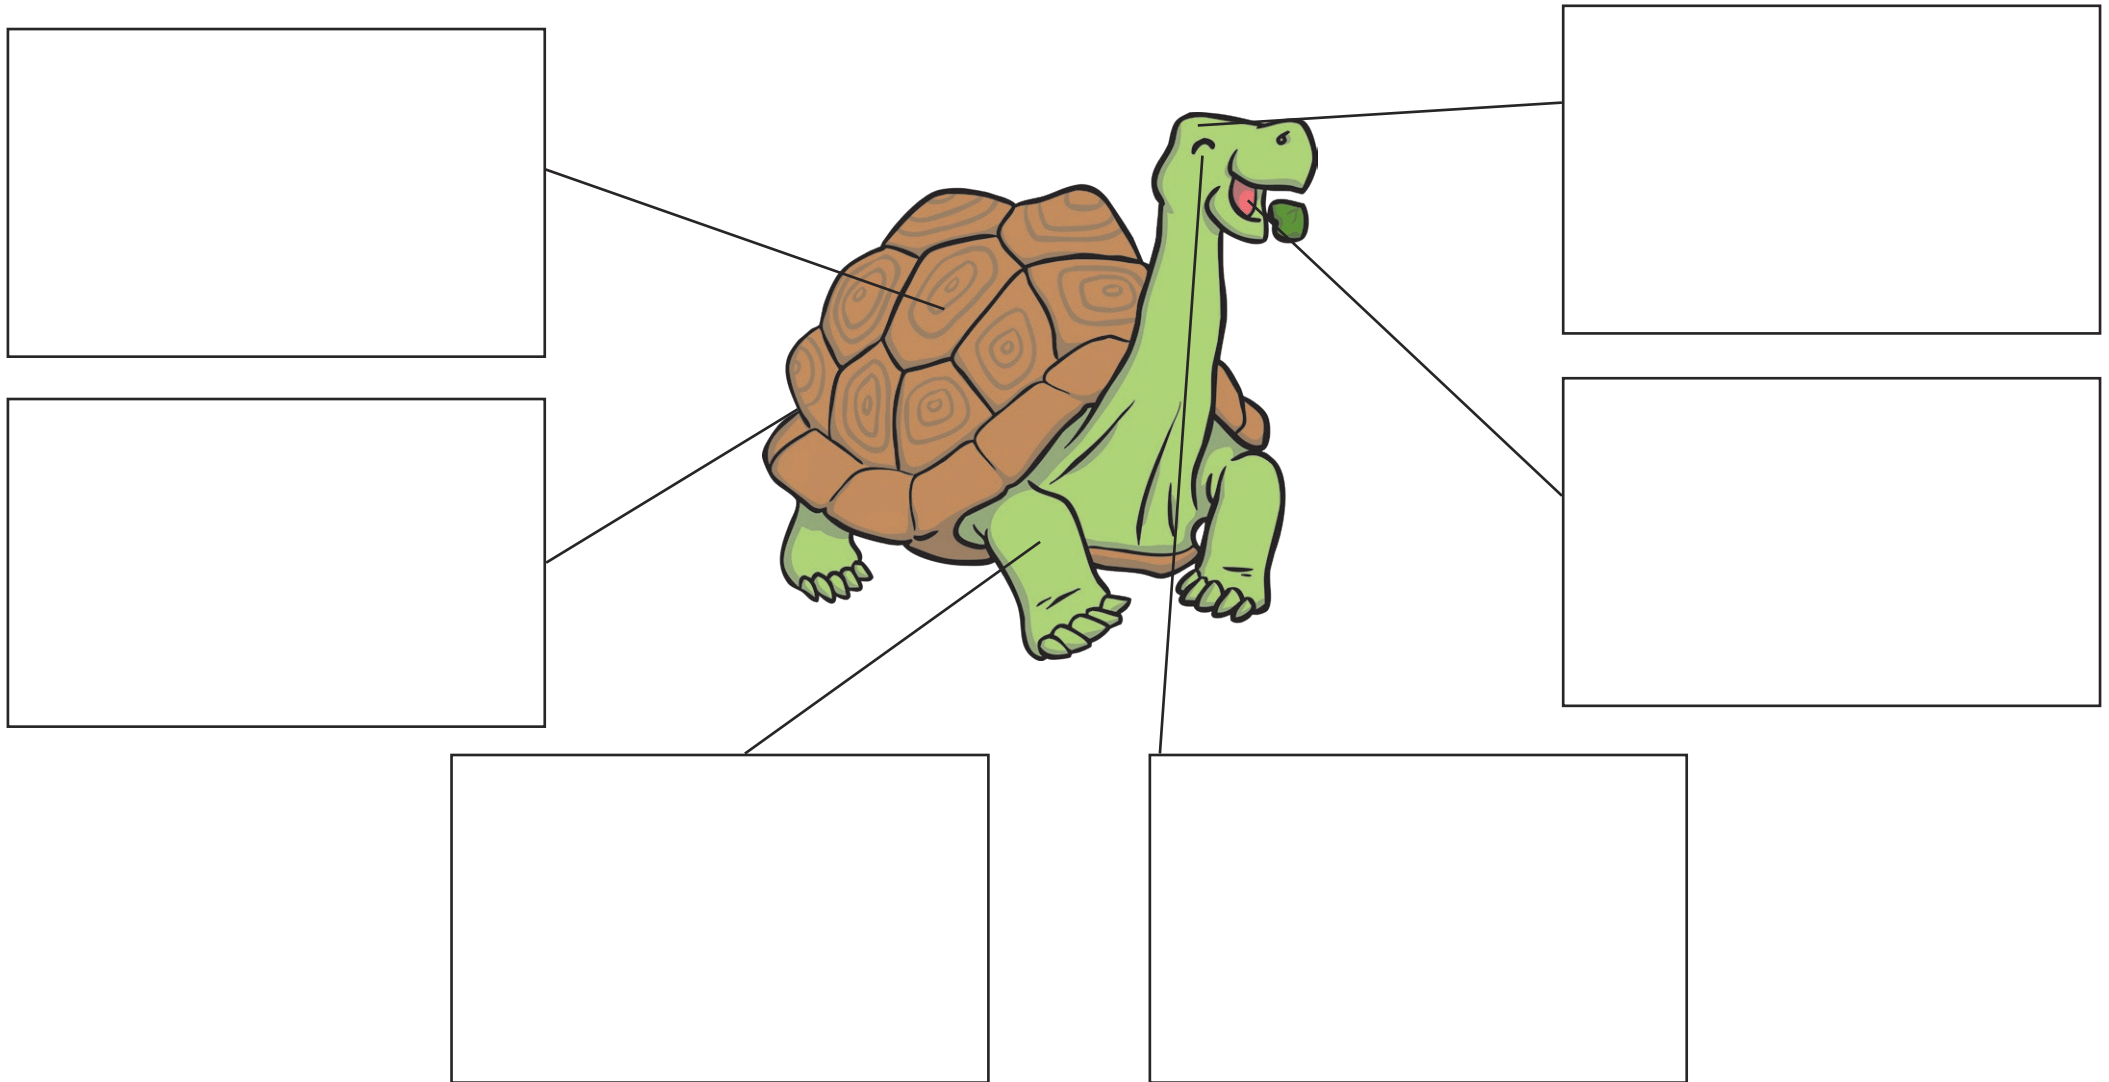

shell	head	mouth
legs	eyes	tail

This is extremely strong but doesn't have any teeth.	These help the tortoise to see very well.	This can be retracted into the shell if the tortoise feels threatened.
Found at the back of the tortoise. Females' are smaller than males'.	This protects the tortoise's soft inner body from predators.	The tortoise uses these to walk. It moves slowly because of its heavy shell.

Parts of a Tortoise

Write a description of each of the tortoise's body parts. Then, cut and stick them in the correct place to label the tortoise.

<p>shell</p> <hr/> <hr/> <hr/>	<p>head</p> <hr/> <hr/> <hr/>	<p>mouth</p> <hr/> <hr/> <hr/>
<p>legs</p> <hr/> <hr/> <hr/>	<p>eyes</p> <hr/> <hr/> <hr/>	<p>tail</p> <hr/> <hr/> <hr/>
